SN100C WS101 WATER SOLUBLE SOLDER WIRE

Nihon Superior SN100C WS101 wire solder is a high activity water washable solder for repairing through-hole, mixed and surface mount assemblies. The flux core provides faster and better fluxing activity than RA flux cores. WS101 flux is formulated to provide high activity soldering, leaving an easily washable residue in plain water without the need for cleaning additives.

APPLICATION:

SN100C WS101 is suitable for use in any commercial hand soldering application. SN100C WS101 is ideal for difficult to solder metals such as brass, nickel and severely oxidized copper.

The flux residues must be removed as they can affect reliability of the joint if left uncleaned. Cleaning is accomplished in plain water but a final rinse in D.I. water is recommended to ensure removal of all undesirable residues.
